

THE TECH

VOL. XXXI. NO. 134

BOSTON, MASS., THURSDAY, MARCH 28, 1912

PRICE TWO CENTS

E. E. SOCIETY DINNER ON NEXT THURSDAY

Mr. Brush of Boston Elevated to
Be Principal Speaker—Ideas
Wanted.

The Electrical Engineering Society will hold its annual dinner on Thursday, April 4th, in the Union. This will be the last meeting of the society before Junior week, and the special efforts that are being made to make it a success should bring out a large crowd. A fine dinner will be served for half a dollar.

The committee in charge has not, as yet, made definite arrangements for the meeting, and any suggestions will be very welcome to them. They are arranging for many surprises, and some of the features will be very unique.

The principal speaker will be Mr. M. C. Brush, second vice-president of the Boston Elevated. His varied experience in the management of several railroad companies will make him an interesting man to hear. His subject has not as yet been announced. Besides Mr. Brush there will be several other good speakers.

In the former dinners singing and cheers have always been prominent, and doubtless will not be omitted on this occasion. The committee will consider any new cheers or favorite songs which any member wishes to have a place on the program. The tickets will be issued before the end of the week.

T. C. A. MEETING.

Rev. A. Stockdale, One of First
Speakers, to Return Today.

Today the speaker at the Christian Association meeting is to be the Rev. A. A. Stockdale. Mr. Stockdale was one of the first speakers of the year, and the crowd liked his talk, and at the same time he liked the informality of the gathering so much that it was soon decided that he should come again sometime in the year.

Mr. Stockdale has chosen the subject, "What is the Use?" for his talk this week, and the Association is anticipating a well-worth-while discussion from him.

AERO CLUB MEETING.

New Officers For Next Year to
Be Elected.

The officials of the Aero Club expect an unusually large attendance at the meeting to be held April 3rd. At this meeting the thesis of Mr. Fales on "Centres of Pressure" will be used, and Mr. Custer will give a short discussion concerning "Propelling Apparatus." Following this the officers for the coming year will be elected.

President Lehmler announces the fact that the Burgess Curtis Company of Marblehead is offering hydroplane flights at twenty-five dollars per flight. This matter will be brought up for discussion at this time. A cordial invitation is extended to all interested, whether members or not.

After having gone for six months with no college paper, a news journal is now to be issued weekly by the Junior class at Tufts. The paper will contain no advertising and will be paid for by student subscription.

ORCHESTRA MAY PLAY AT SPRING CONCERT

Institute Committee Recommends That They Take Part Without Recompense:

A special meeting of the Institute Committee convened yesterday afternoon at 4:20 o'clock, in 8 C. The first matter taken up was the report of the committee appointed to investigate the trouble between the Orchestra and the Musical Clubs. The committee reported as follows: "That the Institute Committee should recommend to, and strongly advise the Musical Clubs to invite the Orchestra to play two numbers at the Spring concert, for which the Orchestra shall receive no recompense other than the admission of its members to the concert. That the Institute Committee advise the Orchestra to accept such invitation to play at the Spring concert, and that they demand no complimentary tickets for their partners, nor ask for any financial reward for their services."

After some discussion as to whether the members of the Orchestra be entitled to a seat, the sentiment being that they should not, the report was accepted.

The committee on the Undergraduate dinner reported that as the plan for having such a dinner is no longer feasible, it be postponed until next year. This report was accepted.

The appointment of L. S. Walsh, 1913, as chairman of the Dining Room Committee, was ratified by the Institute Committee. A committee was appointed to determine the advisability of having the elections of officers of all societies represented on the Institute Committee ratified by the Institute Committee.

HARD PRACTICE RUN.

Cross-Country Squad Covers Muddy Course in Good Time.

Yesterday's run between Highland and the Field was a hard one. As it was the last trip over the course before Saturday's race, all the runners went into it with the idea of covering it in good time. The country was extremely wet and muddy. The recent rains and snows had filled the brook until it was knee-deep and too wide to be easily jumped. The men were forced to run through sticky mud all the way with the exception of the last mile and a half on the roads. The condition of the course was worst along that part which leads through the fields just before the pig pens. Here in some places the mud nearly approached quick sand, and the runners sank in half way to their knees. The pig-pen road was nothing but mud. The melting snow made the descent of the hill so slippery that many of the men, running here at full speed, fell.

The order in which the men finished is of especial interest as yesterday's run so nearly approximated a race that it should throw a good deal of light on the outcome of the Inter-course run. The men finished in the order given below:

Peaslee, '14, and Wilkins, '14 (tied); Hill, '15; Best, '15; Lovell, '15; Bassett, '15; Currier, '14; Loveland, '15; Spencer, '15; Norton, '15; Dunn, '15; Jennings, '15; Kelleher, '15; Hall, '15; Baker, '15; Pollard, '15.

Tech hasn't a political club yet.

ELECTRICALS VISIT WATERTOWN ARSENAL

Tech Men Inspect Large Government Plant—Huge Testing Machine Examined.

About twenty-five members of the Electrical Engineering Society took the trip to the Watertown Arsenal this afternoon. The party left the E. E. Library in Lowell at 1:45, and as soon as they made their wants known to the Commandant at the arsenal an officer was detailed to take them through. They were treated with great courtesy and all thoroughly enjoyed the trip.

The men were taken through the foundry, where castings of carriages for large guns are made. This arsenal is devoted almost entirely to the manufacture of carriages, the guns being shipped from another yard. They then visited the forging shops and machine shops, in which the finishing touches are given to the rough castings and forgings. The turning of the large projectiles was also very interesting. The arsenal maintains a dining room and rest rooms for the employees and provides for them in numerous other ways.

Probably the part of the yard most interesting to the men was the testing laboratories and the famous 800,000 pound Emery testing machine. Tests were being made on small cubes of concrete which was part of a series of concrete tests that had been carried on for some time. The officer in charge of the laboratories showed them the results of former tests of all kinds. He explained in detail a series made on iron columns which brought out the fact that after the product of their length and depth had passed a certain limit, the formulas usually used to determine the strength and other properties of the columns must be altered.

The party were given all the time they wished for the inspection of the yards and most of them returned about five o'clock, feeling that the afternoon had been well spent.

WEEK OF PRAYER.

Meetings for Tech Men to Be Held at Trinity Parish House.

At the Inter-Brotherhood Conference held in Chicago, May 4, 1910, which was attended by representatives of all the separate Protestant denominations, it was voted to recommend the observance of Holy Week, which this year will begin with Sunday, March 31, 1912, as the distinctive Inter-Brotherhood week of prayer.

During this period meetings will be held every evening at the Trinity Parish House on Clarendon street, under the auspices of the Technology Chapter, Brotherhood of St. Andrew. These meetings will be entirely informal, will start promptly at 7 o'clock, and will not last more than a half hour at the most. All Tech Protestants who are interested are cordially invited to attend these meetings and celebrate Holy Week as the week of prayer in a manner in keeping with its significance.

The Harvard-Yale-Princeton angular debate will take place day night. Each college teams, one at home and another. They will be paired as follows at Princeton, Harvard at Yale, Princeton at Harvard.

CREW WILL OBTAIN EIGHT-OAR SHELL

Advisory Council Votes to Pay Half Expenses, With Class of '81.

The Advisory Council has assured the crew of an eight-oar shell. Manager Gere is to purchase a shell from the Harvard Rowing Association, and half of the cost will be assumed by the Advisory Council. The other half will be furnished by the class of 1881. Now that an eight-oar shell has been procured there should be nothing in the way of developing a good crew.

Practice will be held every day at 4 o'clock, except on Saturday, when the practice will be at 3 o'clock. The men have been assigned to report as follows: Monday, Wednesday and Friday, Affell, Font, Gore, Hale, Pickering, Sabine, Shurtleff, Steere, Sweet, Upham, Woerlich, Swain, Hawkins. Tuesday, Thursday and Saturday, Reale, Cleverly, Vasionowski, Lamson, Marion, Moore, Murphy, Perin, Sifton, Surat, Upham, Weaver, Willis, Dufield. If these men can not report on the days assigned they should see the manager at once.

GRIND EDITOR ELECTED.

The 1914 Technique Electoral Board has elected H. A. Morrison Grind Editor. There were seventeen nominations for Assistant Business Manager. The Assistant Manager will probably be elected at the next meeting, to be held next Friday.

TECH SHOW POSTER.

To Be Placed on Sale Monday At Union and Show Office.

The Tech Show poster for this year has just been received from the Poole Printing Co., and is to be placed on sale next Monday morning at the Union and at the Show office.

The poster was drawn by M. E. Haymen, '11, and pictures a gay young señorita in Spanish dress playing upon a mandola. Alongside of the girl is an incense bowl, and through the arising smoke can be seen the shadowy forms of ancient castles. It is done in three flat colors and is exceedingly attractive.

The cost of the poster is twenty-five cents, and they can be obtained at the Cage, Show office, or by applying to any of the men on the Show B.

The University of Illinois is building a new armory. It will be a student armory in the corner and will also be a very large

TRACK.

What has become of the track management; is it dead or only somnolent? We ask this very necessary information for the benefit of men in this school whose interest lies in athletics. The duty of these officials is supposedly to post notices of all coming events in this important branch of sport and to leave entry books in convenient places for the contestants to sign.

Next Saturday the Inter-course cross-country race is to be held; as yet no notices have been posted around the Institute on the various bulletin boards, and the entry book generally placed at the entrance to the living room at the Union is conspicuous by virtue of its absence. This undoubtedly exhibits neglect and indifference on the part of the management; and if these men are unable through outside causes to attend to their work, it is up to them to get off and allow others to take their places who will carry out the duties of the position more efficiently.

While we are on the subject of Track athletics we might remind everybody that the duPont Cup competition is now open. This competition is for all Sophomores and Freshmen, and is given to the man in these classes who makes the best all-round record in track sports.

At present the Field presents a very pleasing sight, nearly one hundred in being out each day practicing, but there are still plenty of men left whose presence at the Field would not only be acceptable, but is necessary, if the school is to keep up its high standard in this branch of sport.

Last year our two lower classes participated in an extremely interesting meet with the Harvard Freshmen, and Technol. was victorious. Another meet is contemplated this term, and it behoves every Freshman and Sophomore who thinks he can help his school in any way to report at the Field, and try out for the different events. But it must be borne in mind that support is essential if we are to repeat last year's victory over the Cambridge school.

COSMOPOLITANS HEAR ABOUT MEMORIAL

E. Farren of Washington Speaks to Executive Committee About Memorial Fund.

E. Farren, representing the Washington Memorial Association, met the Executive Committee of the Cosmopolitan Club yesterday afternoon, and gave them an idea of the purpose and work of the association. He read part of a letter from President Taft, advocating having this building in Washington. Senator Root introduced a bill to permit the use of the land near the Smithsonian Institute for this purpose. The building will probably cost about two million dollars, and an endowment fund of five thousand dollars will be provided. Regents of the Smithsonian Institute will have control of the building.

This enormous fund is being raised by subscription, and J. P. Morgan has just contributed one hundred thousand dollars. The Washington Memorial meeting of the Tech Cosmopolitans will now be allowed to hang over until next year, because of there not being time to do it in proper shape this year.

MINING SOCIETY.

Prof. Carver Gave Lecture On "Agricultural Economics."

Last night the Mining Engineering Society held another meeting in the Union, which was rather poorly attended, only fifteen men being present. The speaker was Professor E. A. Carver, Professor of Economics at Harvard, who gave an exceptionally interesting lecture on "Agricultural Economics." This is a subject which the miners very seldom have an opportunity of hearing, and deserved a larger attendance.

The lecture was illustrated by slides of agricultural conditions in France, Holland, Ireland, Denmark, Sweden and several other less important European countries, which were undoubtedly the best which have ever been shown here. At the close of the meeting refreshments were served.

MUSICAL CLUBS.

Concert to Be Given at West Roxbury April Tenth.

On Wednesday evening, April 10th, the combined musical clubs, which have been inactive for the last three or four weeks, will give a concert at the Masonic Temple in West Roxbury. The members are to go to the hall early and attend a banquet, after which they will give a short concert, followed by dancing. In connection with this Manager Partridge desires to know just as soon as possible exactly how many men are sure of going, so that the correct number of seats may be reserved. This is the second time within a very few weeks that the clubs have played for the Masons, and only serves to show how popular the organization has become. This will positively be the last public appearance before the Spring concert.

PROF. JACKSON SPEAKS.

Addresses Harvard Union About Engineering as a Profession.

Professor D. C. Jackson addressed the members of the Harvard Union last night on the subject of Engineering as a Profession. Professor Jackson spoke of the progress of engineering in the last few years, and of the wide scope of the engineering profession.

He laid particular stress on the differences of an engineer and a mechanic, and the qualities that go to make up a real engineer.

HIT up the stroke, man! It takes class to show speed!

Velvet hits it up mighty fine in the pipe! Selected middle leaf—the choicest—two years of aging in the warehouse—the nature process of seasoning—mellowing—takes two years to let the bite out, put the flavor right—make the whole smoke smooth. Velvet hits it up in a slow but sure manner and when Velvet hits your pipe—well that's the time we win—a friend! Don't forget, two years of aging—"Velvet." At all dealers.

GOLF CLUB CONSIDERS OFFERS OF CLUBS

No Final Decision But Woodlawn and Wollaston Links Are Both Popular.

At the fourth meeting of the Golf Club, yesterday noon, President Howlett appointed D. V. Mason, W. N. Holmes and P. A. Russell as a committee to take charge of tournaments and handicaps. Word has been received from the Woodlawn Golf Club in Auburndale, and the following terms are offered: Men from the Tech club may have the privilege of playing on their links from now until the first of June at ten dollars a member. The Wollaston Club's offer was again put before the members and was favored by a majority. The terms are five dollars a man for two months' use of the links, but this does not include Saturday afternoons, as the Woodlawn offer does. Both clubs have invited our men to examine their links and play on them, and as several members are still in doubt as to which is the best, the final selection has been put off till the next meeting.

The clubs mentioned and the Allston Club make these exceptionally low offers only to members of the Golf Club, but any man may take advantage of them by joining the club.

Arrangements have already been made with a sporting concern to sell golf sticks and other goods to members of the club at a reduced rate, and the club will be fully equipped within a week. The time of the next meeting has been fixed as Wednesday, the third. A full attendance is expected as a vote will surely be taken and other important business discussed.

EXCHANGE EXHIBIT.

The current exhibition in the display room of the Architectural department, in Pierce Building is an exchange exhibit from the Chicago School of Architecture, which is a part of the Armour School of Technology. The work shown is that done by the Sophomore, Junior and Senior classes of the Chicago school, and is of great interest. A Tech man, Mr. A. N. Rebori, '07, is in charge of architecture there.

STATE CLUB FORMING.

Men From New Jersey Attempt Formation of Brotherhood.

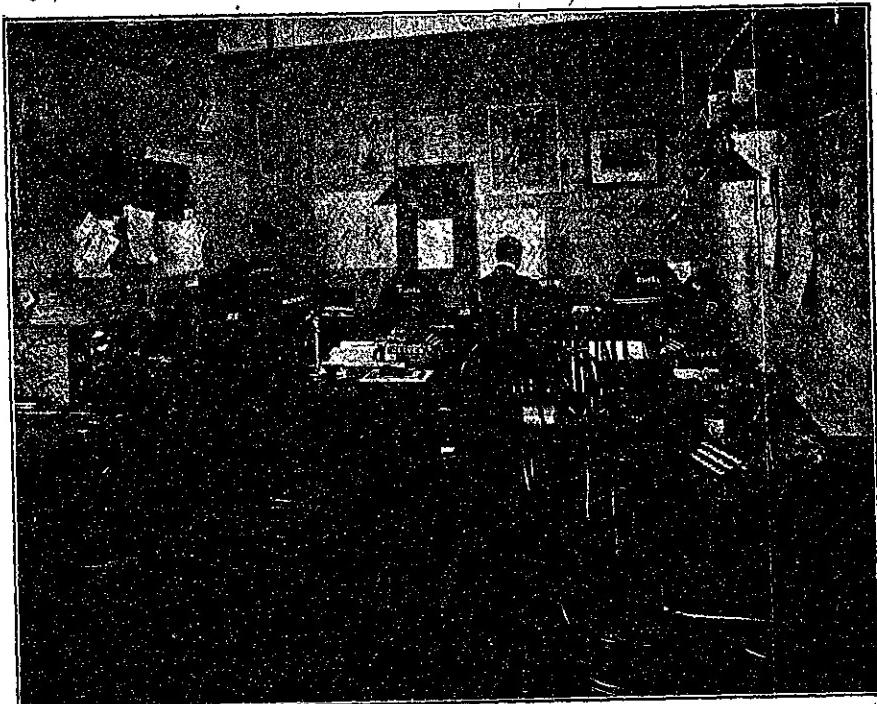

New Jersey men will gather in one of the small rooms in the upper part of the Union on Friday, at 5 o'clock, in an effort to form another State club.

There are now in the Institute a very large number of men who come from this State, and since they are prominent in many lines of activity, the club should have one of the strongest organizations found among the minor clubs.

COLLEGE TRACK.

The University of Pennsylvania started its track season in a very promising way. Over 200 men reported to the veteran coach, Mike Murphy, for the first practice. The team will be headed by H. Burdick, who tied for first place in the high jump in the I. C. A. A. A. meet last Spring. Murphy will coach the Penn men until after the relay carnival, and then will give much of his time to coaching the American Olympic team.

Only a small squad reported to Coach O'Connor at Brown for the first practice, but many of them were new to track, and the veterans will be out later. Brown has several stars this season, and should place well in the N. E. I. C. A. A. meet. Taber and Captain Marble are sure point winners.

SENIORS, YOU CAN RUN AN OLIVER IF THE FRESHMEN HEELERS ON THE TECH can. They all like it--so will you

It is cheaper to hire an Oliver than a stenographer — and you will get more satisfactory results on your thesis.

You can RENT the Number 5 Model Oliver for twenty consecutive months — then it will belong to you; or you can rent the No. 3 Model Oliver with a stand from month to month for \$3.00 per month.

ONE PIECE HAMMER IN THE NEW MODEL *Ithaca*

IF you see more than one hole in a hammer you know that extra parts are fastened to the hammer whether shown or not. Our hammer is all one piece, only one hole, no toggles or stirrups attached.

WE have cut out all cocking levers, bars, push rods, and hammer-stirrups and cock the gun direct from toe of hammer.

OUR hammer travels less than half an inch, taking only 1/25 of a second to operate.

STOCKS are not cut away for hammer or lock plates and are dovetailed into frame to prevent splitting and spreading.

THE speed of our lock will increase your score at traps and kills in the field; the simple scientific construction of the gun makes it practically fool-proof, and will last you a lifetime. If you take care of it and a good many years if you don't.

CATALOG Free; 18 grades, \$17.75 net to \$400 net. OUR 6 1/4 lb. 20 bore is a hammer-beowdah-to-draw and shoot one.
